The fund

Improving European Models is invested in European equities with a predominance of large and mid caps, integrating extra-financial criteria in the selection and analysis of the securities in the portfolio. **The fund has been awarded the LuxFlag label.**

Improving Models investment process

► Convictions associated with a proprietary methodology and integrating a 'Best in Class' analysis

► Focus on attractive valuations of companies with earnings momentum:

• Regular (Steady Improvers)

• New turn (Fast Improvers)

Investment universe

The objective of the Fund is to participate in the rise and fall of the European equity markets by investing at least 75% of the net assets of the Fund in European equities, through a discretionary Bottom-Up management approach favouring the search for intrinsic quality of the securities, integrating ESG criteria in the selection and analysis process of the securities in the portfolio.

Risk indicator - SRI

Discretionary management risk
• Capital loss risk • Equity risk
• Small cap risk • Sustainability risk
• Emerging equity risk • Derivatives risk
• Interest rate risk • Credit risk
• Speculative securities risk
• Convertible bonds risk • Counterparty risk
• Currency risk • Liquidity risk.

PORTFOLIO

European markets recorded a second consecutive month of gains, supported by a solid annual earnings season. Most companies reported an improvement in activity at the end of 2024 and provided slightly better-than-expected outlooks for 2025. At the same time, the period was marked by Donald Trump's tariff upheavals and his push to force other NATO members to increase their military spending.

In this context, **our Fast Improvers** outperformed the market, driven by the banking sector (Société Générale, Banco Santander, Standard Chartered...) as well as Metso, whose earnings report confirmed an acceleration in order intake.

Among **our Steady Improvers**, defensive stocks stood out, particularly Jeronimo Martins and Deutsche Telekom, which reported strong results and highlighted the potential of T-Mobile US.

During the month, we took some profits on our banking positions (Standard Chartered, Bawag) and increased our exposure to the telecommunications sector (Deutsche Telekom, KPN), while continuing to build our position in GTT.

FOCUS: SOCIETE GENERALE

SDG 8

SOCIETE GENERALE A few months after taking over as CEO of Société Générale, replacing Frédéric Oudéa, Slawomir Krupa unveiled an ambitious strategic plan in September 2023, aimed at restoring the bank's profitability by 2026.

However, the first year of execution proved challenging, with quarterly earnings reports generally falling short of the announced trajectory.

In Q3 2024, the CEO decided to take decisive action, personally overseeing the French retail banking division, which is central to the 2026 plan's objectives. Under his leadership, the cost-to-income ratio of this division is expected to drop below 60% by 2026 (vs. 76.6% in 2024), a massive effort to be achieved in just two years. This will primarily be driven by cost savings in external and IT expenses, along with a simplification of the bank's organizational structure.

If successful, the group could more than double its profitability in three years, with a 2026 ROTE target of 9-10% (vs. 4.2% in 2023). Additionally, a strong capital position (>13% CET1) could lead to the redistribution of excess capital to shareholders through dividends or share buybacks.

If the transformation unfolds as planned, this Fast Improver holds significant upside potential.

Comment on Impact Indicators

The impact of the portfolio is being monitored as we want to contribute positively to the development of a sustainable economy.

► Breakdown by Rating ESG

We have no stocks with a rating below BB.

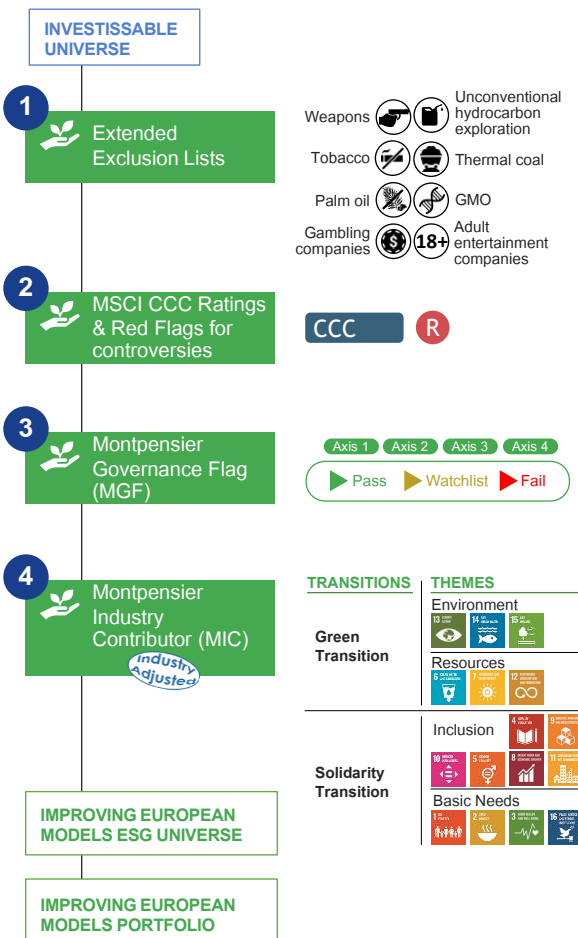

► SDG Impact Analysis

Our proprietary Montpensier Industry Contributor method allows us to analyse the environmental and social impact of our stocks in line with the 17 UN SDGs. This month, for example, we find that the portfolio has a particularly positive impact on SDGs 8, 9 and 13.

► Environmental performance

The portfolio's carbon intensity and footprint are lower than those of the index.

Select **responsible** values with a **positive impact** on the environment and society

The approach of taking into account extra-financial criteria is a selective approach, based on the proprietary 4-step extra-financial analysis methodology, developed by Montpensier Arbevel, with the objective of mitigating sustainability risks, without however being able to guarantee that sustainability risks are totally neutralized. The data used is mainly supplied by MSCI ESG Research and may be supplemented, modified or updated by the Management Company from other sources.

BREAKDOWN BY ESG RATING

ENVIRONMENTAL PERFORMANCE

WEIGHTED AVERAGE CARBON INTENSITY Scope 1 et 2
(Tons of carbon emissions/\$M Turnover)

CARBON FOOTPRINT Scope 1 et 2 (Tons of carbon emissions/€M invested)*

Available data for 100.00% of Improving European Models and 99.94% of Stoxx 600

At the date of the report, 41 companies, that is 9.11% of funds positions, accounting for 92.81% of the invested portfolio weight, officially disclose quantitative data about their GHG emissions (Scope 1 and 2). Other data are based on MSCI ESG Research estimations.

*Under Delegated Regulation (EU) 2022/1288, starting from December 2023, the carbon footprint is standardized by EVIC (Enterprise Value + Cash). Previously, this standardization was conducted using market capitalization.
