Select **responsible values** with a **positive impact** on the environment and society

The approach of taking into account extra-financial criteria is a selective approach, which is based on the proprietary 4-step extra-financial analysis methodology developed by Montpensier Arbevel applied to convertible bond underlyings, with the objective of mitigating sustainability risks, without however being able to guarantee that sustainability risks are totally neutralized. The data used is mainly supplied by MSCI ESG Research and may be supplemented, modified or updated by the Management Company from other sources.
